Projects

Weather Dectation Website 2025

- developed a dynamic weather detection website that fetches real-time weather data from external APIs, providing users with accurate temperature, humidity, and forecast details. The project integrates API calls, state management, and responsive UI components to deliver a seamless user experience.
- Github : <https://github.com/kushagra-1010/Weather-Dectation>

Juspay 2024

- Developed a dynamic weather detection website that fetches real-time weather data from external APIs, providing users with accurate temperature, humidity, and forecast details. The project integrates API calls, state management, and responsive UI components to deliver a seamless user experience.
